

Exp: 8

Introduction dashboard with
table using google sheet data.

AIM:

TO Create an interaction table
dashboard that integrate data from google
sheets and visualize it using bar chart,
line plots.

Materials required:

- tabulate desktop.
- Google account for verification
- Py module for plotting
- coding environment.

procedure:

- S₁: prepare the data
- S₂: Connect the table
- S₃: Create the individual visualizations
- S₄: Build the dashboard.

Result:

Create an interaction table
dashboard linked the google sheet,
allowing user to explore sales and
compare to produce performance.
